

2017 CORPORATE CATALOGUE

Srixon is a brand owned by Dunlop Sports co. Ltd., a subsidiary of Sumitomo Rubber Industries Ltd., specializing in golf and tennis. Srixon is most well known globally for its golf balls, holding the largest number of golf ball patents worldwide, and having previously supplied other leading manufacturers such as Dunlop Slazenger with great success.

They also produce a full range of golf clubs and accessories.

Srixon is a registered trademark of Dunlop Sports and Dunlop Sports is a Company of the Sumitomo Rubber Industries Group.

The word SRIXON is derived from what was formally known as SRI Sports , X which means unlimited and ON which means going onwards.

The full Srixon golf ball line-up is available for customisation in the form of a logo or text personalisation. Minimum order quantity for logo: 3 dozen Minimum order quantity for personalisation: 2 dozen

NEW

Z-STAR PURE WHITE

The new Z-STAR with next generation SpinSkin™ gives players unmatched feel and control, while the new Speed Dimple™ technology combines with the Energetic Gradient Growth™ core to deliver incredible distance.

NEW

Z-STAR XV PURE WHITE

The new Z-STAR XV has an enhanced dual Energetic Gradient Growth™ core and Speed Dimples™ for long penetrating distance, and the new SpinSkin™ coating provides exceptional control.

AD333 TOUR - PURE WHITE

The AD333 Tour is a premium ball designed especially for golfers that don't possess tour level swing speeds but demand the precision of a tour level golf ball.

AD333 PURE WHITE /YELLOW

The new AD333 provides the perfect combination of distance off the tee and spin control around the green. Coupled with superior soft feel and the visual performance of both Pure White and Tour Yellow, this is our most advanced 2 piece golf ball to date.

SOFT FEEL SOFT WHITE / YELLOW

Now in its 10th generation, the new Srixon Soft Feel golf ball provides even better feel on all shots, improved greenside spin and incredible distance and accuracy from tee to green.

SOFT FEEL LADY SOFT WHITE

The new Srixon Soft Feel Lady golf ball, in its 5th generation, features the same performance benefits as the Soft Feel with a slightly higher launch.

ULTISOFT WHITE / YELLOW

The UltiSoft is designed specifically for golfers with low to mid swing speeds who are looking for the ultimate in feel without sacrificing distance. The super-low compression of our softest ever E.G.G core delivers an incredibly soft feel whilst maintaining maximum initial ball speed to generate longer, straighter distance.

2017 GOLF BALLS VALUE SELECTION

DISTANCE

This Distance golf ball has higher initial velocity, a softer compression compared to the previous model and a penetrating ball flight to provide optimum distance with responsive soft feel.

DISTANCE IN A MEGABOX

RANGE BALLS

Minimum order quantity:
500 dozen

SRIXON RANGE 1PC YELLOW / WHITE

The Srixon 1 piece Range Ball offers superior durability and performance. Its 3 x higher durability will bring more value to your customers and last longer. With its limited flight design it will also suit shorter driving ranges. Offered in white and yellow. Please allow for extended delivery times with bespoke logo. (4-5 months from point of approval)

SRIXON RANGE 2PC WHITE / YELLOW

The Srixon premium 2 piece Range Ball offers great performance and added durability. With its full flight characteristics and exceptional soft feel it is close to a playing ball and offered your customer a outstanding Range experience. Please allow for extended delivery times with bespoke logo. (4-5 months from point of approval)

CLEVELAND GOLF WEDGES

588 RTX-3 / RTX 2.0

Three innovations combine to maximize spin with more consistency. New Tour Zip Grooves have a deeper, narrower U shape with a sharper edge radius in all lofts to enhance contact across a wide variety of conditions. The advanced, 2-pass micro milling pattern increases friction and is directionally enhanced by loft: low lofts (46°-52°) have a straighter pattern to accommodate full shots and high lofts (54°-64°) have a more angled pattern to optimize open-face shots. Laser Milling precisely roughens the face surface to the conforming limit.
